

Quik-Gard™

High Performance Guardrail Delineation

Quik-Gard is the next generation in guardrail markers! This truly innovative system is an economical, durable and extremely effective method of delineating guardrail both night and day. Utilizing premium quality plastics and highly reflective fluorescent sheeting (optional), this guardrail delineation system has been designed for superior performance and illumination of guardrail systems.

Installation is simple! The “notched profile patent-pending design” allows an installer to easily maintain vertical and horizontal alignment - NO GUESS WORK! Quik-Gard delineator attaches to wood, plastic or steel bumper blocks with screws, nails or glue, whichever method you prefer!

Perfect for increasing safety at:

- ❖ Dangerous Curves and Intersections
- ❖ Entrance / Exit Ramps
- ❖ High Speed Areas
- ❖ Low Visibility Areas
- ❖ Work Zones
- ❖ Wrong Way Areas

Several Guardrail Delineator Sizes Available:

3" x 4"
Delineator
“I”

4" x 6"
Delineator
“L”

4" x 13"
Delineator
“T”

- ❖ Quik-Gard is available in white for right side delineation, yellow for left side and or red for wrong way applications.

Plastic Safety
Systems, Inc.

- ❖ Larger reflective surface provides greater delineation which is highly promoted in the FHWA, “Elderly Driver Report”

- ❖ Ability to sheet Quik-Gard on both sides allows you to provide clear delineation for entrance/exit ramps and also warn motorists in a **wrong way** situation as shown above.
