

Quik-Mark™

"The Faster, Safer Object Marker System"™

Plastic Safety
Systems, Inc.

Plastic Safety Systems, Inc. has manufactured a unique new two piece object marker system consisting of a polyethylene reflective panel mounted to an "L" bracket with standard hardware. The "L" bracket can be mounted to the concrete barrier wall with a new adhesive available through Plastic Safety. **This glue down method drastically reduces setup time and maintenance costs!**

• Quik-Mark panel is available in many sheeting & size configurations.

The Quik-Mark™ Advantage:

- Impact resistant panel and bracket is reboundable ensuring maximum reflectivity of panel even after an impact
- Durable panel is available in custom sizes and several sheeting variations
- Two piece system allows for ease of maintenance and lower replacement costs
- Optional adhesive allows for faster on-site installation
- Panel is reversible
- "L" bracket and panel are impact modified and U.V. stabilized

• Quik-Mark can be a combination of bolted, glued or butyl taped down to concrete surface.
