Recommended Specification for a Temporary Portable Rumble Strip

- 1.) The rumble strip shall provide significant audible and vibratory alerts to drivers.
- 2.) The rumble strip shall measure approximately 11' long, 12" wide and 13/16" thick.
- 3.) The rumble strip shall maintain position on asphalt or concrete roads, without the use of adhesives or fasteners.
- 4.) The rumble strip shall be flexible along the 11' length, so that the strip can be conveniently rolled up in a diameter less than 24", for storage or transport.
- 5.) The rumble strip shall maintain rigidity in the 12" width. The strip shall not curl or otherwise deform.
- 6.) The rumble strip shall have a 12° bevel on the leading edge.
- 7.) The rumble strip shall have a non-slip surface texture.
- 8.) The rumble strip shall be made of flexible, engineered polymer materials.
- 9.) The rumble strip shall be black in color.
- 10.) The rumble strip shall function properly on wet road surfaces.
- 11.) The rumble strip shall be installed and removed without any auxiliary equipment or machinery.
